

AAXTREME COAT[®]

Brake Coating Technology

- Premium defense against rust jacking
- Proven to withstand tough environmental conditions
- Economical solution to extend brake life

Withstands tough environmental conditions

Hendrickson's brake coating reaches the next level of protection with its patent-pending AAXTREME COAT[®] brake coating technology. Through rigorous testing and development, AAXTREME COAT brake coating technology has proven to withstand harsh environments and abrasive chemicals that can cause corrosion and cut brake life short.

The next level of rust jacking protection

Designed and specially formulated for applications where extreme environmental changes can increase the likelihood of rust jacking, AAXTREME COAT brake coating technology is a premium brake coating that can be specified on any INTRAAX[®] or VANTRAAX[®] integrated suspension system or TRLAXLE[®] non-integrated axles with HXS[®] Hendrickson Extended Service[™] brake shoes.

AAXTREME COAT® Features and Benefits

Excellent corrosion and galvanic protection

Specially tested and formulated to withstand the toughest, most extreme environments and provide premium protection against rust jacking.

Stable at elevated temperatures

Designed and tested to remain stable at elevated temperatures for ultimate protection against harsh environmental changes.

Easily removable

Created so that lining blocks can be easily removed for the re-lining process to help maximize core credits.

Low maintenance and economical solution

Formulated to protect brake shoes from rust jacking thus extending brake life while saving time and money.

Putting AAXTREME COAT brake coating technology to the test

Salt Spray and Cyclic Corrosion Test

AAXTREME COAT premium brake coating withstood over 1,000 hours of salt spray testing and rigorous cyclic corrosion testing designed to mimic real-world environmental conditions.
