Introducing the New...

Severe-duty QUIK-ALIGN® Pivot Bushing

In February 2020, Hendrickson Truck Commercial Vehicle Systems introduced a **NEW** aftermarket severe-duty pivot bushing for PRIMAAX® EX • FIREMAAX® EX suspensions for service replacement.

The **NEW** QUIK-ALIGN® pivot bushing

- Modified rubber bushing design enhances bushing life under severe braking, acceleration and articulation events
- Offers improved durability for severe-duty applications such as refuse, logging and oil field tankers
- New design provides up to 50% improvement in installation time
- Retains the same PRIMAAX EX • FIREMAAX EX driver comfort and performance
- Patent-pending "snap tabs" provide a snap retention feature for thrust washers to allow quick and easy installation
- Thrust washers maintain pivot bushing lateral positioning to help deliver longer bushing life and preserve pivot connection integrity
- Rubber is bonded to the inner metal which eliminates inner bushing friction greatly reducing inner bushing wear
- Increased inner metal mating surface area helps to maintain full pivot bushing clamp load and improve joint reliability

New Aftermarket Only Severe-duty QUIK-ALIGN Pivot Bushing Kit

- Axle Service Kit No. 60632-043 with 1" fasteners, includes pivot bushing, thrust washers, QUIK-ALIGN collars and fasteners

The component replacement procedure is slightly different from the standard production heavy-duty pivot bushing. Refer to the appropriate Hendrickson PRIMAAX EX • FIREMAAX EX technical publications for complete service and safety instructions available online at www.hendrickson-intl.com.
