

Why Use Rubber in Heavy Truck Suspensions?

Hendrickson Genuine Parts are the same quality components installed in Hendrickson original equipment suspensions — consisting of the same design, construction, performance and durability. There's only one way to maintain and protect your suspension's original performance. Ask for the name that is synonymous with the finest manufactured suspensions in the world.

All applications must comply with applicable Hendrickson specifications and must be approved by the respective vehicle manufacturer with the vehicle in its original, as-built configuration.

For additional details regarding specifications, applications, capacities, and service maintenance instructions, contact Hendrickson.

Actual product performance may vary depending upon vehicle configuration, operation, service and other factors.

Call Hendrickson or visit our global websites for additional information.

Advanced Rubber
Component Technology

- Extended fatigue performance
- Weight efficiency
- Reduced maintenance
- Improved ride quality

Hendrickson leads the advancement of suspension and component technology as a result of more than 60 years of elastomer development and over 25 years of elastomer manufacturing experience. These accomplishments allow us to fully integrate components, modules and systems that meet commercial vehicle owners demands for durability, weight savings and low life cycle costs.

To learn more about Elastomer Products, call Hendrickson or visit our global websites for additional information.

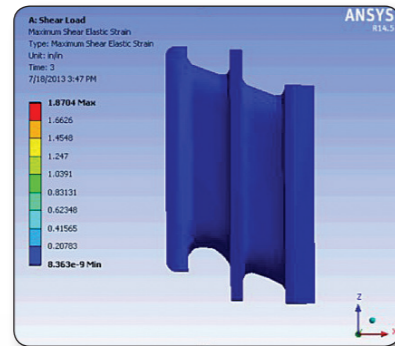

ELASTOMERS

Durability Tested to Hendrickson's Rigorous Standards

Component development begins with state-of-the-art engineering software models to identify stress points and simulate suspension performance in various real-world road and load conditions.

Initial designs are built and tested in our advanced research lab, then installed on vehicles for validation in the field.

Integrated Component Development Alongside Suspensions and Springs

Our labs feature advanced testing equipment that can test a full range of products from specific components to full suspension systems.

These simultaneous testing and design capabilities lessen time to market and increase full suspension system quality.

Optimised System Performance and Weight to Meet Application Criteria

All components are designed to strict product requirements, just like our full spring assemblies and suspension systems.

Hendrickson understands the importance of each component design for future evolving application criteria.

Elastomer Products

Hendrickson's unique elastomer design capabilities result in higher performing, more durable, maintenance-free bushings.

SPRING EYE BUSHINGS

Spring eye bushings are designed as a system providing enhanced spring performance in the areas of roll stability, ride and durability.

Thru Bolt

Split Ring Cartridge

Bar Pin

RUBBER SPRINGS

Our advanced components have re-defined the way rubber spring suspensions perform. The innovative, high grade rubber designs withstand heavy loads in rugged applications.

Shear Spring (ULTIMAAX®)

Progressive Spring (ULTIMAAX® 40T)

Progressive Spring (ULTIMAAX® 32T)

Progressive Spring (ULTIMAAX® 26T)

Progressive Spring (HUV®)

Bolster Spring (HAULMAAX®)

Progressive Spring (HAULMAAX®)

Bolster Spring (HAULMAAX®)

Progressive Spring (HAULMAAX®)

TORQUE ROD BUSHINGS

Unique bonded torque rod bushing designs reduce the friction and heat that often damage ordinary bushings – providing longer life and greater payload. A wide variety of bushing configurations are available to meet various application and attachment needs.

Severe-Duty

Split Ring

Taper Pin

Heavy-Duty

Standard-Duty

BEAM BUSHINGS

Premium rubber beam end bushings provide enhanced flexibility between the beam and the axle to absorb braking and acceleration forces and provide designed articulation / compliance to help ensure high mobility demands. Equalising beam center bushings are designed for specific types of Hendrickson walking beam suspension capacities and configurations to maximise system performance.

Rate Ring End Bushing

Spherical End Bushing

Voided Center Bushing

Tri-Functional III Trailer Bushing
