HENDRICKSON SPRING Advanced Spring Technology

- Larger payloads
- Superior performance
- Exceptional durability

With experience, expertise and vision, Hendrickson continues to redefine leaf spring and suspension engineering for military and commercial vehicle applications around the world. Hendrickson's innovations in exclusive manufacturing and materials technology have revolutionized leaf spring performance. Proprietary suspension technology allows for engineering design efficiency to reduce weight, improve ride performance, and increase durability.

SPRINGS and BUSHINGS

Today, Hendrickson has further advanced state-of-the-art spring technology with additional weight and cost reductions, while taking another step forward in further increasing strength and spring life.

Monoleaf Spring

Innovative spring design provides truck steer axles with a more efficient suspension system and significant weight savings.

Off-Road Bogie Spring

Rear heavy-section parabolic springs designed and produced for a variety of off-road applications.

Parabolic Taper-Leaf Spring

Custom designed for a variety of on-highway and off-road applications.

Multi-Leaf Spring

Rugged yet efficient design to suit a variety of demanding applications.

Airlinks

Suspension main support members provide excellent ride without sacrificing handling.

Z-Spring

High-performing air suspension main support members provide enhanced durability.

Solid and Tube Stabilizers

The advantages of tube stabilizers are becoming increasingly important in weight-critical applications in the new generation of trucks.

Advanced Bushings

High-performance and durable elastomer products that provide tuneable features to meet a wide range of demanding commercial vehicle applications.
